Standard Product Information

Legs: I-frame leg consists of a cast aluminium ski with steel column and frame, powder coated silver.

Footspread: on all Active tables is 600mm.

Feet: 2 x black, lockable castors and 2 x standard castors.

Leg Positions: Legs are positioned 100mm from the end of the table. Inset legs, 300mm from the end of the table, are available as a no cost option. N.B. AC-06 is only available with inset legs.

Top Finish: Table tops are available in melamine and veneer finishes. All tops are pressed on 25mm mdf board.

Melamine - white, maple, oak, cherry, walnut

Veneer - maple, beech, oak, cherry, walnut

Grain Direction: All veneers are straight grain. Veneer grain direction will run along the length of the table.

Edge Details: Melamine tops

Square edge - 25mm thick

Chamfered edge - 25mm thick mdf chamfer

Both edges are lipped in 2mm ABS matching the top.

Edge Details: Veneer tops

Square edge - 25mm thick

Chamfered edge - 25mm thick mdf chamfer.

Deep square -38mm thick

Edges are lipped in 2.5mm solid matching the top.

Linking: Four black, nylon, rotating arms lock in pairs to link the tables.This is available as an upcharge.

N.B: linking is not available on tables with a chamfered edge.

Cable port: A brushed aluminium cable port with hinged lid and black brush strip allows cables to pass through the table top. The cable port can be positioned either centrally or offset.

Cable tray: The cable tray runs the length of the underframe and simply drops into position. No fixings are required.

N.B: two sizes of cable tray are available for each rectangular top size, depending on the position of the legs, standard or inset. This is available as an upcharge.

Cable tray bridge: The cable bridge supports cables from one cable tray to another when tables are linked together. The small cable bridge is used with the standard leg position. The large cable bridge is used when inset legs are specifi ed. They are available as an accessory.

Leg cable riser: U shaped cable riser snaps onto the leg column. This is available as an accessory.

Finishes: The cable tray, cable tray bridge and cable leg riser are steel, powder coated silver, black or stone to match the frame.

Modesty panel: The modesty panel fixes into and runs the length of the underframe. The panel is 300mm in height, frosted plastic.

Umbilical cable riser: Translucent, plastic rings with a weighted foot allow 4 way segregation of cables.
