Meridian®

A readily adaptive storage solution for evolving workplaces

Meridian Storage

Meridian offers a suite of storage solutions that enhance your experience of work by keeping tools and essential items organised and close to hand. The design efficiently stores personal and work items, creates boundaries, and provides places for people to gather, while also serving, when desired, as an attractive focal place for a space.

Meridian's strength lies in its ability to evolve as an organisation's needs change. Its modular elements stack up, open from either side, and can be easily interchanged to create spaces where individuals and groups have the support to do their best work, both now and in the future.

Productive

Hardworking elements provide ample space for housing personal items, as well as the digital and analogue tools shared by groups. Options for wardrobes, storage units, and drawers – as well as mobility and power – add to the design's utility.

Architectural

Creatively combine Meridian storage elements to shape spaces that allow people to engage in an ideal mix of focused and collaborative activities. Stacked or standing alone, Meridian defines pathways between settings. The design also creates boundaries between workspaces, providing the privacy necessary for individual work. Cushion-topped drawers provide convenient guest seating.

Flexible

A Meridian configuration can simultaneously provide storage, display, boundary, and work surface. Modular and reversible, Meridian quickly and easily adapts as an organisation grows. Interchangeable modules are available in a variety of sizes and configurations that will efficiently accommodate both current and future storage needs. Within each unit, options for customisation abound. Shelves, trays, and dividers can be configured to suit an individual or groups' unique requirements.

Envision storage that also helps people gather, share and connect.

Details and Features

Standard Pull

Personal Storage Locker

Flipper Door

Seat Cushion

Dry Planter Top

Pass-through Unit

Veneer File Surround
